

FRESH FIELD

Investment Overview

Real Farms. Real Yield. Real Returns.

Seed Round: \$980K

185 Investment NFTs | 4 Tiers

Updated: February 2026

FRESH FIELD

Real Farms. Real Yield.

Executive Summary

Fresh Field is revolutionizing agricultural investment by combining blockchain technology with real-world farm operations in Kurdistan, Iraq. Our Investment NFTs offer seed-round investors two distinct income streams:

- 1. Monthly Production Income:** Immediate returns from ownership of verified livestock (hens and cows), with graduated profit sharing of 25-50% depending on tier.
- 2. Phase 2 Royalties:** 8% of all future Production NFT sales, distributed among all 185 Investment NFT holders, creating unlimited scaling potential.

Key Investment Metrics

Metric	Value
Total Raise	\$980K
Investment NFTs	185 total (4 tiers)
Animal Assets	44,850 hens + 65 cows
Production Start	Within 30 days of investment
Investors Payout	Within 90 days of investment
Phase 2 Launch	Q2 2026 (Production NFTs)

Investment Tier Structure

All Investment NFT holders receive graduated profit sharing (25-50%) from their animals PLUS 8% share of all Phase 2 Production NFT sales.

Tier 1: Founding Partner - \$20,000

Supply	20 NFTs
Animals	2 Cows + 800 Hens
Monthly Income	\$1,243
Profit Share	50%
1 year cash-return	74.6%
Phase 2 Royalties	8% share (all 185 holders)

Tier 2: Growth Investor - \$10,000

Supply	25 NFTs
Animals	1 Cow + 350 Hens
Monthly Income	\$515
Profit Share	45%
1 year cash-return	61.8%
Phase 2 Royalties	8% share (all 185 holders)

FRESH FIELD

Real Farms. Real Yield.

Tier 3: Community Builder - \$5,000

Supply	40 NFTs
Animals	310 Hens
Monthly Income	\$212
Profit Share	30%
1 year cash-return	44.2%
Phase 2 Royalties	8% share (all 185 holders)

Tier 4: Early Supporter - \$1,259

Supply	100 NFTs
Animals	77 Hens
Monthly Income	\$38
Profit Share	25%
1 year cash-return	36.2%
Phase 2 Royalties	8% share (all 185 holders)

Phase 2: Production NFT Royalties

All 185 Investment NFT holders share 8% of every Production NFT sale in Phase 2. This creates unlimited scaling potential as Production NFTs grow.

Example Royalty Earnings:

Production NFTs Sold	Total Royalty Pool	Per Tier1 NFT (2.05%)	Per Tier4 NFT (0.13%)
1,000 Hen NFTs	\$1,352	\$27.72	\$1.75
10,000 Hen NFTs	\$13,520	\$277.21	\$17.48
100 Cow NFTs	\$39,200	\$803.61	\$50.67
1,000 Cow NFTs	\$392,000	\$8,036.08	\$506.68

Note: These royalties are in addition to monthly animal production payouts. The 8% is distributed proportionally - each Tier 1 NFT receives approximately 2.05% of the royalty pool (\$20K/\$980K), while each Tier 4 NFT receives approximately 0.13% (\$1,259/\$980K). Royalties are paid at the time of each Production NFT sale.

Risk Factors

Animal Production Risks: Disease, weather, feed costs, and other agricultural variables can impact production.

Phase 2 Adoption: Production NFT sales may be slower than projected, affecting royalty income.

FRESH FIELD

Real Farms. Real Yield.

Regulatory Changes: Changes in Kurdistan or international regulations could impact operations.

Market Conditions: Commodity prices for eggs, milk, and livestock can fluctuate.
